

Fixed Wireless Access for Wholesale Service Brochure

Wireless internet for the connected enterprise

Version 1.0

expereo
faster to the future

Welcome to the intelligent internet

Because business never stops

When your enterprise customers want to seize the opportunity to expand, they need to be open for business quickly or connect to a location that cannot be served with a fixed line. Expereo's Fixed Wireless Access will get those sites up and running in a flash.

Our all-in-one managed mobile broadband offers a trusted alternative addition to a fixed line with scalable, resilient connectivity across 136 countries. This means business continuity, wherever you need it.

Welcome to the intelligent internet

Quick, flexible and cost-effective deployment

Offer true physical diversity over the last mile to terrestrial networks. With Expereo's Fixed Wireless Access you get a comprehensive package that spans 136 countries worldwide, at a fixed price. This makes it an ideal choice for carriers who require backup connectivity or remote site access for their enterprise customers.

A cost-effective backup connectivity solution – If your primary connection suffers an outage, Fixed Wireless Access has got you covered as a backup or failover service.

Up and running, fast – If you need short-term connectivity, we can deploy rapidly as a temporary solution, or until fixed access can be delivered.

Extend reach to remote locations – Fixed Wireless Access provides 'last-mile' connectivity in remote areas, or where the investment into cable or fibre would be cost-prohibitive. Which makes it the go-to option for a wide number of business and industrial applications where you need day one connectivity, or an investment into a wired connection cannot be justified.

Service characteristics

Expereo Fixed Wireless Access provides excellent wireless network performance while keeping you up to date on usage and service quality.

Bandwidth

10MB Download / 10MB Upload

Multi MNO SIM

Usage Restriction

upon reaching the data bundle threshold

Data Bundle

15GB per month

Usage Alert

upon reaching the threshold

Dynamic IP

A versatile alternative when fixed internet isn't an option

Reliable and adaptable network connectivity is essential for any business. But maintaining an internet connection isn't always guaranteed. And in more remote or field locations, wired connections simply might not be available.

Our all-inclusive wireless solution encompasses everything your customers need for business resiliency and growth. We offer enterprise-grade mobile network hardware and market leading data plans with expert setup and installation. We'll help keep your customers up and running too, with continuous monitoring, maintenance, and alert services.

Achieve faster deployment and business continuity

Expereo Fixed Wireless Access provides excellent wireless network performance while keeping you up to date on usage and service quality.

Always connected, even in the event of an outage – No terrestrial connection at a remote site? Need a failover option for your primary connection? We can deliver Fixed Wireless Access that can be used as your primary, failover or underlay network.

Full visibility and global support in one place – Through our intuitive network visibility platform, expereoOne, you get complete transparency into your network health and performance. Monitor the real-time delivery status of every service so you can ensure smooth user experiences, with access to global support from a single location.

Simplified pricing – Forget multiple pricing tiers. Do away with hidden fees and complicated billing structures. Our simplified pricing approach allows you to budget and forecast network expenses and make more informed decisions.

Welcome to the intelligent internet

Continuity and agility, from one provider

We provide the foundation of the wireless experience

Enterprise-grade intelligent wireless edge solutions with onboard antennas can meet the networking needs for sites, vehicles, IoT, remote work and more.

We offer superior site performance and reliability

Gain fast internet connection without the need for fixed connectivity through access to various local mobile networks.

We provide inherent flexibility

Where traditional connectivity is challenging. Where fixed lines cannot reach. Where rapid deployment is required. We enable the continuity that businesses need to operate, everywhere.

We provide local support

Regardless of your site locations, we offer dedicated local hands to assist you with device setup. Our SD-WAN certified experts can configure the devices based on your specific global WAN requirements.

Enjoy 24/7 service management with usage alerts

Experience the convenience of a single support point of contact that efficiently manages all your global sites.

Welcome to the intelligent internet

Ready to go wireless?

Fixed Wireless Access

1. Fair Use Policy: The internet service is based on a fair use policy. Expereo reserves the right to take appropriate action, including but not limited to the suspension or termination of the service, if we reasonably believe that your use of the service is in breach of this policy.
2. Internet breakout at regional hubs for enhanced control, performance and flexibility
3. FWA is wireless connectivity for internet access, SD-WAN or iVPN services.
4. Minimum Term: The minimum term for the internet service is 12 months, starting from the service's activation date.
5. Equipment and SIM Return: Upon service cancellation, customer must return any equipment and SIM card provided by Expereo. The equipment and SIM card must be returned in good condition within 2 weeks after the end of the billing period. If the equipment and SIM card are not returned within this timeframe, a No Return Charge of EURO 950 will be applied.
6. General Terms and Conditions: In addition to these specific terms and conditions for the FWA internet service, the general terms and conditions of Expereo apply. These general terms and conditions govern all services provided by Expereo and can be found on our website.
