faster to the future

Hyperconnected without compromise

The hyperconnected future relies on connectivity. This means digital enterprises need an internet infrastructure that can handle the needs of cloud-first strategies, SaaS deployments and hybrid working. Not to mention the ever-increasing demands of new technologies, such as AI and Machine Learning. So, when connectivity fails, the impact can be both immediate and significant.

The move to global IP infrastructure is happening fast. Organisations need a flexible, reliable and agile network that can respond at the pace of change. But the internet is complex. Only a partner who truly understands the internet and the available technologies, regulations and contracts in place can help them move quickly.

Our robust Global Internet solution makes the complex simple. It encompasses dedicated internet access, broadband internet and fixed wireless access – to guarantee you with the strongest possible network to ensure business continuity.

With a global network of ISP partners, we have built a digital platform that brings together our ecosystem of partners in one place, covering technology, pricing, regulations and deployment times. Giving you speed and agility in decision making, with the confidence you are working with a partner who understands your environment.

Seamless, reliable, and secure global internet services

Expereo Global Internet is our dedicated and broadband internet offering for global enterprises. As part of our intelligent internet services, we enable you to leverage our deep local network and technology insight to create the best solution to meet the needs of your business.

Maximise the potential of cloud

As you move to the cloud, introduce new ways of working and expand into new markets, this means migrating to a more agile IP infrastructure. We are centred around empowering you with seamless, reliable, and secure global internet services. To deliver your business strategies in a digital way, wherever people are working from, while maximising operational efficiency and productivity.

Migrate effortlessly from MPLS to a robust Internet WAN network, optimising your cloud strategy for enhanced performance and agility. With a predictable, high performing network with zero downtime, you don't have to worry about impacting customer experience or hindering your business strategies.

Elevate your site's **resilience and performance** with Expereo Global Internet. Gain access to a diverse range of options and configurations, allowing you to tailor a design that perfectly suits your needs.

Keep your business moving

As an experienced partner who understands the internet, we manage the complexity of your IP infrastructure. By removing the hassle of managing hundreds of suppliers across the globe, we give you the time to get back on with your business.

And, we bring it all together in a single visibility platform, expereoOne, so you can effortlessly monitor the health of every site, from the palm of your hands, wherever you are. With complete visibility and easy access to analytics you can track network performance. So you have the confidence that you are in control of your environment at all times.

Migration without the migraines

Our digital platform brings together a global ecosystem of ISP partners in one place, covering technology, pricing, regulations and deployment times. This is how we can build you a solution faster and more accurately. Why do it yourself, when we can remove the pain and complexity?

Streamlined cloud connectivity – Our robust global internet services ensure seamless connectivity to the internet and your public cloud applications. Plus, our reach to local networks allows for optimised site designs. This means great application performance, and easy access to cloud resources.

The best internet experience in the market - We offer local and enhanced internet solutions, for direct and optimised access to leading cloud service providers. So, you get optimal performance and data transfer efficiency, with the best user experience.

Adaptability to your changing business needs – You're migrating from private IP to internet and cloud applications because you need scalable and flexible solutions. Our internet services are designed to adapt to the changing needs of your business, such as traffic peaks and expanding workloads. So you can focus on higher value tasks.

Global reach and network performance – An international presence requires global connectivity. Our extensive network of partners and connectivity coverage spans 190 countries across the globe, allowing seamless connectivity and optimised network performance worldwide. With strategically located points of presence and AI-driven internet optimisation, we ensure the highest performance and improved user experiences for accessing cloud applications. From any location.

Cost efficiency and optimization – Migrating to the cloud comes with costs. But they don't have to be overwhelming. Our internet services are designed to optimise costs while maximising performance. With competitive pricing, flexible billing options, and proactive management you can optimise network utilisation. All while minimising unnecessary expenses and maintaining a high-quality cloud experience.

Expert support and consultation, throughout your migration – With five support centres located in every global region, this ensures a 'follow the sun' model. We'll provide guidance and the human touch every step of the way. From initial planning and assessment to implementation and ongoing support, we are committed to ensuring a seamless migration experience.

The future is boundless

In today's hyperconnected world, we make it our business to ensure your business never gets left behind. With our Global Internet, you won't only get online faster, you gain more operational resilience and uninterrupted performance.

We give you everything you need in one place

expereoOne offers you complete visibility of your infrastructure and its health, as well as invoices and overlay solutions such as SD-WAN down to site level. Meaning visibility and control from a single view – on any device – at your fingertips. By combining your SD-WAN overlay with your network overlay, we offer you a rock solid infrastructure that enables you to get the most out of your SD-WAN investment, with predictable application performance.

Your future success is ours, too

As a global internet leader for 20 years, this means we understand the internet better than anyone, and bring that understanding to all our customers. Through personal engagements with our experts, we'll develop the right solution for your business needs, and connect you with people who manage the relationship throughout.

We're proud to be vendor agnostic

We don't believe in compromise. That's why we never ask our global customers to adjust their requirements to local internet providers. We offer an exhaustive choice of trusted access options, including last-mile options as well as 4G/5G connectivity. Together, we'll decide the best technology solution for your needs and your local sites.

We provide local support

We have people on the ground in the region where you need them. Speaking your language and ready to support in your time zone. Global support delivered by real people, locally, means cutting down travel-related carbon footprints too.

We actively monitor, 24/7

Experience the convenience of a single support point of contact that efficiently manages all your global sites. With expert monitoring of your global WAN, potential issues are proactively identified and addressed before they impact your operations.
