

Regional Overview

Grow your business in the Middle East with fast connectivity and reliable network performance.

Version 1.0

Welcome to the intelligent internet

Agile network connectivity, wherever you do business.

Expereo delivers the ability to scale and transform your business with fast and reliable connectivity across the Middle East and the world, all done in the confidence of meeting local regulations and understanding of the local market.

The Middle East is becoming a strategic hub connecting East to West, and a new region for growth with many hyperscalers now hosting their services in the region.

With the domination of state-owned incumbents and monopoly structures in most countries in the Middle East, the sourcing of Internet links in region may sound challenging. We help you source the most reliable services to keep you connected while following all applicable regulatory frameworks.

Enabling business agility with:

- ✓ Network connectivity in over 190 countries, 14 countries and territories in the Middle East alone
- ✓ Managing local paperwork & requirements on your behalf
- ✓ Accelerating fiber deployment to your site
- ✓ Global procurement, local availability
- ✓ 24x7 proactive support
- ✓ Single invoicing and single MSA
- ✓ Pricing includes all local taxes
- ✓ Industry-leading network management via expereoOne
- ✓ Award-winning customer service

Welcome to the intelligent internet

Enabling your business to deliver on time. Every time.

Expereo manages thousands of sites throughout the Middle East for local and global enterprises.

Our managed service for global internet connectivity removes the complexity of managing multiple ISP's when deploying your global network. We provide you with:

- a single global contract
- a single network design
- a single point of contact

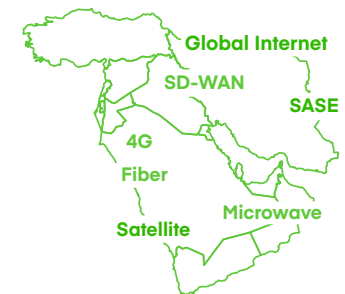

Freeing your team to focus on growing your business.

Are you looking for reliable connectivity for your offices in the Middle East?

A variety of last-mile options across 14 countries and territories in the Middle East, including fiber, microwave, and satellite, as well as LTE network connectivity, Expereo can provide the best support for each local site, backed by expert vendor-agnostic advice.

From oil refineries in Iraq, to financial institutions in Dubai, when it comes to reliably connecting people, places, and things, we have you covered.

Welcome to the intelligent internet

Always connected, always in control: expereoOne

expereoOne is a unique platform that displays detailed overviews of your global estate, including all locations, products and services deployed, right down to the site.

With a deep analytical overview, we provide pro-active network support, and with current and historical data, we provide you with a clear health overview of your network. This invaluable insight for troubleshooting and understanding the user experience is all accessible via a single, user-friendly pane of glass.

Your single source for underlay and overlay solutions

Sustainability and Corporate Responsibility
